

CHEVALET Collection

INTENDED USE: Multifunctional armchair, designed for comfort, style, versatility and to last over time. The sartorial quality finishes and the completely removable cover underline its contemporaneity, making it an attractive object that can be inserted in the most varied contexts: home, contract, office.

MATERIALS UTILIZED: The collection is made of cold-foamed coated polyurethane, upholstered, with a wooden base.

FINISHES: Wood surfaces, being a natural material, could, over time, undergo color changes with use and exposure to light. Moreover, by their nature, these surfaces are uneven and easily damaged: some small impurities and imperfections fall within the accepted quality standards.

CLEANING: Clean the wooden surfaces with a soft, damp cloth soaked in lukewarm water. Dry immediately after cleaning. It is possible to use specific products suitable for cleaning wood, after checking users recommendations.

To clean the fabrics used by Gaber, consult the specific technical data sheet.

WARNING: This sheet complies with the provisions of the law and of April 10, 1991 n.126 "Rules for consumer information" and with the Decree of February 8, 1997 n. 101 "Implementing Regulation".
This article has also passed a series of tests corresponding to the UNI EN 16139 AC: 2013 standard.
