

CLARO SLIM Collection

INTENDED USE: Table available in different high and dimensions, compactop or laminated table tops (suitable for outdoor purpose with compactop). Tables suitable for use in the most varied hospitality and contract environments.

MATERIALS UTILIZED: Table with co-injected metal-polymer frame. Table tops are made of Compactop or made of chipboard support material and laminate surfaces, ABS edged.

FINISHES: Slight differences in shades between different surfaces are possible. Furthermore, in the case of products purchased at different times, despite the use of durable materials for use in outdoor environments, natural-climatic factors can cause slight variations in shades.

CLEANING: No specific maintenance other than normal cleaning is required for Compactop and Laminated tops. The tops can easily be cleaned and disinfected with hot water, steam and any common non-abrasive household detergents and disinfectants, as long as these are not highly alkaline. Just a couple of precautions are necessary: avoid using strong acids and bases and avoid wiping with highly abrasive substances or equipment.

Metal surfaces in steel and aluminum should be cleaned with a soft, damp cloth soaked in hot water. For stubborn stains, mild liquid soap can be diluted in water in moderation. Always dry after cleaning with a soft cloth. Do not use creams or pastes to clean metals, do not use chlorine, bleach or aggressive detergents. Do not use abrasive pastes or sponges that can scratch metal surfaces.

DISINFECTING: Gaber's techno-polymer products can be sanitized using the following list, in where resistance of the techno-polymer is emphasized to these substances on the side.

Techno-Polymer Chemical Compatibility: depends on temperature/pressure and concentration, important always no abrasive detergents.

Acetone – Excellent Resistance
Alcohols Ethyl and Methyl- Excellent Resistance
Ammonia – Excellent Resistance
Acqua Regia – Good Resistance, Minor Effect
Bleaching Liquors = Sodium hypochlorite 1% Excellent Resistance - Suitable
Bleach = Sodium hypochlorite 5% - 20° (68°F) Excellent Resistance -Suitable / 60° (140°F) Fair - Not recommended
Bleach = Sodium hypochlorite 10%-15% - 20° (68°F) Excellent Resistance -Suitable / 60° (140°F) Fair - Not recommended
Bleach = Sodium hypochlorite 20% - 20° (68°F) Excellent Resistance -Suitable / 60° (140°F) Fair - Not recommended
Bleach = Sodium hypochlorite 100% - 20° (68°F) Severe effects – Do not use
Calcium Carbonate – Excellent
Chlorine Aqueous – Saturated Solution 20° (68°F) Excellent Resistance - Suitable
Swimming Pool Free Chlorine residual Level: around 1 ppm (mg/l) 20° (68°F) Excellent Resistance - Suitable
Chloroform – Fair Resistance, moderate effect
Clorox (Bleach) – Excellent Resistance
Glycerin – Excellent Resistance
Sea Water – Excellent Resistance
Soap Solutions – Excellent Resistance
