

LINK Collection

INTENDED USE: The Link collection consists of chairs and stools, lounges, chaise longues and outdoor tables in metal with classic and elegant lines, particularly suitable for hospitality, public spaces and gardens. The intersections of the various elements of the structure also act as a primary aesthetic element.

MATERIALS UTILIZED: The collection is made entirely of metal. Upholstered cushions made of polyurethane foam are available as an option.

FINITURE: Slight differences in shades between different surfaces are possible. Furthermore, in the case of products purchased at different times, despite the use of durable materials for use in outdoor environments, climatic-natural factors can cause slight variations in shades. Damage to protected surfaces can cause oxidation and the subsequent appearance of rust, especially in environments with high levels of humidity and salinity.

CLEANING: Metal surfaces in steel and aluminum should be cleaned with a soft, damp cloth soaked in hot water. For stubborn stains, mild liquid soap can be diluted in water in moderation. Always dry after cleaning with a soft cloth. Do not use creams or pastes to clean metals, do not use chlorine, bleach or aggressive detergents. Do not use abrasive pastes or sponges that can scratch metal surfaces.

To clean the fabrics used by Gaber, consult the specific technical data sheet.

WARNING: This sheet complies with the provisions of the law and of April 10, 1991 n.126 "Rules for consumer information" and with the Decree of February 8, 1997 n. 101 "Implementing Regulation". This article has also passed a series of tests corresponding to the UNI EN 16139 AC: 2013 standard.
